## ALK SET FOR "SAFETY FIRST"

Everything is in readiness for the local play "Safety First," which will be staged in the Elks Hall, Carbon on Wednesday, April 30th. The final touches are being added and the cast feel that they are ready to put the play before the public.

The following is the cast of "Safety First;"

### —THE CAST—

**Mabel Montgomery,** Jack's Wife  
**MISS KATHLEEN WATKINS**

**Virginia Bridger,** Her Young Sister  
**MISS KATE RAMSAY**

**Mrs. Barrington-Bridger,** Their mother  
**MRS. G. W. MALTON**

**Zuleika,** A Tender Turkish Maiden  
**MISS DAPHNE NASH**

**Mary Ann O'Finnerty,** An Irish Cook  
**MRS. G. G. PETERS**

**Jack Montgomery,** A Young Husband  
**E. J. ROULEAU**

**Jerry Arnold,** An unsuccessful Fixer  
**A. H. JEALOUS**

**Mr. McNutt,** A Defective Detective  
**J. A. MacDONALD**

**Elmer Flannel** Awfully Shrinking  
**HARLEY C. WILLSON**

**Abou Ben Mocha,** A Turk from Turkey  
**ROY WACKER**

Under direction of **G. G. PETERS**

Reserved seat tickets may be procured at Mack's Drug Store and it is advantageous to get one. These seats are the best in the hall and then you won't have to rush to the place of entertainment a half hour before hand.

The curtain rises promptly at 8:30 p.m. Be there on time if you don't want to miss the opening scenes of the play.

Following the performance a dance will be held in the hall, to which no extra admission charge will be made to those attending the play.

Be sure and reserve those seats before the end of the week.

### EASTER SCHOOL REPORT

**GRADE III**—Mabel Fuller 87; John Rogers 83; Ernest Fox 81; Gladys Bramley 78; Jean Skerry 74; Harold Wise 69; Cecil Trumbley 66; Raymond LeMay 65; Jack Heath 64; Elmer Wolfe 61; Betty McQuade 60; Marjorie Leatch 57; Frances Poxon 56; Douglas Prowse 52; Irene Soles 51; Billy Dixon 50; Zona Fairbairn 42; Jimmy Kyle 40; Alice Kyle 32.

**GRADE 14**—Roy James 79; Marjorie Martin 75; Agnes Skerry 65; Sydney Bramley 65; Sammy Malton 64; Stanley Ramsay 62; Robert Wise 60; Bonnie Zeigler 56; Esther Ohlhauser 47; Casswell Jewell 27.

**GRADE V**—Billy Oliphant 71; Ferguson Greenan 69; Finlay Code 68; Mary Tatterton 66; Betty Code 63; Jim Hunt 59; George Jealous 58; Lee McIntire 56; Bill Graham 56.

### PROVINCIAL GOVERNMENT PLACES BAN ON IMMIGRANTS

Announcement has been made by Hon. Geo. Hoadley, minister of agriculture, that a ban has been placed on immigration into Alberta until such time as the unemployment situation clears up. The only type of immigrants who will be welcomed are those who may come with the purpose and ability to settle on land of their own, with sufficient means to maintain themselves for a reasonable time.

Instructions have also been given to the Alberta agency in London to recruit no more British farm boys for the present, and arrangement that had been made to bring over an additional party this spring, has been cancelled.

The government intends checking up every single activity in the way of immigration in order to develop future immigration along safely controlled lines and with a view to clearing up the difficulty now existing. The British boys are not being kept out because there is any doubt about the soundness of the scheme, but merely that the labor market is overcrowded.

## LITTLE ITEMS OF LOCAL INTEREST

Born, to Mr. and Mrs. G. F. McGregor, on Saturday, April 19th, a daughter.

Miss Millicent James, who is attending Normal school at Edmonton, arrived home Saturday to spend a few days with her parents, Mr. and Mrs. J. E. James.

Miss Edith Braisher of Calgary is home for the Easter holidays.

"Jake" Ohlhauser has secured the Watkins business for this district and is now making his rounds in the country.

Jim Smith was a Calgary visitor last Saturday.

Miss Kathleen Watkins spent the week end holiday at her home in Champion. She returned to Carbon on Monday.

Mr. and Mrs. Clarence Hay and son arrived Saturday from Empress and were visitors with Mr. and Mrs. A. Hay.

Have you reserved your seat for the play "Safety First?"

The Misses Millicent and Phyllis James are spending a few days in Calgary this week, the latter taking in the Teachers Convention.

Ken Anderson and Eli Spry returned from Turner Valley last Saturday. We understand that they have been promised work in a few days.

Mrs. Jas. Ramsay, Kate and Bruce, motored to Calgary on Tuesday.

Mr. A. English has resigned his position as manager of the Imperial Building Supplies Lumber Yard and expects to leave on May 5th for Vancouver, with his family. He is holding an auction sale of his household furniture on Saturday, May 3rd.

J. M. MacDonald is spending the Easter vacation in Calgary.

### CANADA'S FOREST FIRE LOSS IS VERY HEAVY

The forest fire situation in Canada during 1929 was one of the most severe ever experienced and might easily have been the most disastrous in our history but for the development of fire fighting methods which has taken place in more recent years throughout the federal and provincial forest services and other agencies interested in forest fire protection.

The portion of the Dominion chiefly affected during the past season consisted of an area extending from western Ontario to the Pacific coast. This area experienced very little snow fall during the winters of 1927-28 and 1928-29. During the spring and summer of last year there was almost a complete lack of rain and this condition combined with extended periods of high winds served to create an unparalleled condition of extreme dryness throughout Western Canada. In the eastern portion of Canada, including eastern Ontario, Quebec, New Brunswick and Nova Scotia, dry periods were prevalent, but were punctuated by occasional and timely rains.

The outstanding feature of the 1929 fire season was the extraordinary expenditure for suppression action alone, the cost of which was \$978,000. This does not represent the total cost of protection, but merely the cost of fire fighting. In this respect it is the highest figure on record for any one season in the Dominion.

The greater part of this expenditure was incurred in Western Canada. The lack of precipitation previously mentioned caused a recession of water levels in lakes, rivers, streams and muskegs, and this effect combined with high winds which prevailed for long periods, made control measures exceedingly difficult, since fires starting, spread rapidly over large areas.

### 31 PER CENT INCREASE IN WESTERN CROP ACREAGE

With a prepared acreage greater by 31 per cent than that of 1929, a better moisture situation and other indications presaging general good conditions for the year, the Canadian West will resume seeding this week, after a short interruption by heavy rainfall of last week, according to information received by the agricultural department of the Canadian Pacific Railways.

The improved moisture situation will compensate farmers for the short suspension of farming operations during last week. Seeding became general around April 10. The increase in prepared acreage is attributed to the large amount of plowing achieved last fall. The prepared acreage this year is 23,028,529 as compared with 17,563,153 last year.

### FORMER CARBON EDITOR STAR HOCKEY PLAYER

In the last issue of the "Linotype News" was a picture of Frank Peters, formerly of Carbon and one time editor of the Carbon News in 1921-22. Along with the picture is the following write-up regarding this young man's career:

#### Boston Operator Star Hockey Player

Frank Peters, Boston's contribution to the professional hockey ranks, a rattling flier on runners, and a prince of good fellows, is also a clever Linotype operator.

Born in New York State, Frank was only three when he informed his "pop" he would like to get a "skate on." Unaware of the popular expression of those days, his dad misunderstood his son and carried him into Canada. When at school in Edmonton, Alberta, Frank was prominent in hockey games.

After leaving school, he went into business with his dad at Carbon, as country newspaper publisher, and started to hit the keyboard of a Linotype. After playing with different amateur hockey teams, Peters came to Boston and signed up with the Minutemen in 1923 and since then has played hockey with different American and Canadian teams, the latest being the Philadelphia Arrows. They say he is a "Wow."

But in the off season when operating a Linotype for his dad in Boston, you'd never recognize that quick, unassuming lad as the dashing Peters of ice fame.

Hubert Peters, his father, conducts a trade shop at 289 Congress Street, Boston, and business at present indicates that hockey fans may be deprived of their idol in the near future, for Frank and his dad are close pals and it's a question of choosing between his "Pop" and his hockey, then it's goodbye to the ice game and a valuable addition to the Linotype business.

Mr. and Mrs. Alex Sobyski and son motored to Edmonton on Friday last and spent a couple of days at the Capital.

## WARNING ISSUED RECORDS SAW FLY

Farmers are being urged by the Department of Agriculture at Edmonton to take immediate steps to combat the wheat stem sawfly which, it is feared, will make serious inroads upon the crops throughout a wide area this season, unless steps are taken at once to fight it.

It is advised that a strip, the width of a drill, be seeded at once, around the outside of any field to be cropped. This strip should be cut in July and will be found to be heavily infested with the pest. The remainder of the field should be comparatively free.

An urgent message was sent out to the rural press of Alberta on Wednesday afternoon by the Department of Agriculture, stating that Prof. Strickland, noted entomologist, fears serious inroads by the wheat stem sawfly throughout a wide section of central Alberta this season. A survey of the Province shows that this area extends from Chauvin in the north-east, across to Viking, down to Camrose, south to Drumheller and Brooks, across to Empress on the east. Within this line it is said that farmers must take prompt action in order to combat the threatened disaster. It will be noted by farmers that the Carbon district, which is heavier soil, is not mentioned as a possible infested area, but it would be wise for everyone to take all precautions, as we are near to the Drumheller district. It is also apparent that the department of Agriculture has not issued their warning soon enough in this district, as the early seeding on the outside of the field was to protect the later grain from being infested, the eggs of the sawfly being laid in the ripened section. Practically all the seeding has been completed around here.

### AMAZING CONTRASTS MAKE GRIPPING SCREEN DRAMA

Amazing contrasts incorporated in a logical story that grips, with outstanding performances by a great aggregation of players, makes Paramount's "Forgotten Faces," which is showing at the Carbon Theatre this week, an exceptional motion picture.

The production is billed as an all-star special and it is. Clive Brook, Mary Brian, Baclanova, William Powell, Fred Kohler and Jack London head the imposing list of talent in the cast. The story interest, unusual sets, vivid contrasts and dramatic value of the production entitle it to the rating of a special in the most complimentary sense of that term.

Imagine a picture that starts out with a night hold-up of a fashionable gambling house perpetrated by two crooks in evening clothes, carries on to the grim interior of a penitentiary, shows an attempted prison break, gives intimate glimpses of social life in a home of wealth and culture and then depicts the terrified reactions of a woman being slowly driven mad by fear.

## 50,000 CAMERAS TO BE GIVEN AWAY

### CELEBRATING KODAK'S FIFTIETH ANNIVERSARY

All Children whose twelfth (12th) birthdays come in 1930 are invited to accept a FREE Camera and a roll of Kodak Film. To be given away Starting May 1st. Come Early! 24 is all we have. Bring a parent or guardian with you to sign the receipt.

Catering To Tourists

Approximately twenty millions of dollars will be expended by the Governments of the three Canadian prairie provinces in the construction and maintenance of good roads this year, not to mention several more millions which municipalities will devote to other roads not included in the system of through Provincial highways and main market roads. It is a lot of money. It represents the largest single item of expenditure for any one service. It means an outlay of at least ten dollars for every man, woman and child in Western Canada.

A very considerable portion of this vast sum is being expended on the assumption that, quite apart from the benefits that will directly accrue to our own people by reason of these good roads, they will be the means of attracting an ever increasing volume of tourist traffic from other Provinces and the States to the south, and that these visitors will bring much business and profit to our people through the purchases and expenditures they will make in this country. In a word, the avowed object of a goodly portion of this expenditure is to encourage visitors to tour the West.

Good roads, admittedly, are essential if we are to develop a large tourist business. But, in themselves, they are not enough. These prospective tourists can find good roads, possibly better ones than we can offer, much nearer home, if a fine highway over which they can speed in comfort and safety is all they are looking for. They will come to Western Canada to enjoy a new, a virgin land. They come expecting something different. What is Western Canada going to provide?

Are we going to allow our highways to be disfigured,—as they have been south of the international boundary line,—by unsightly billboards and advertising devices of various kinds, defacing the landscape, obscuring the scenic beauties our country has to offer, oftentimes confused by drivers with the legitimate road directions, signs, and an eyesore to all? Governments and municipalities can, to a large extent, control the placing of such signs on the highway right-of-way, but individual property owners must co-operate by refusing permission for the erection of billboards and the plastering of signs on private property and buildings.

Our cities, towns and villages should seek to make their respective communities attractive to the visitor, and special attention should be devoted to the approaches to the main roads leading into and out of each settlement. The smaller the place, the more important it is that the surroundings be bright, because they are noted to a greater extent by visitors than is the case in larger centres.

Community spirit and enterprise should find expression in having all places in which visitors are interested, and must visit, as, for example, hotels, cafes, garages, post offices, as clean, neat and efficient as possible. Gasoline and oil companies are setting a good example in making filling stations attractive in appearance, especially in larger centres, with rest rooms, wash rooms, comfort stations, etc. They are out to give service. Other businesses may well emulate them. Even the smallest place on a through highway can support such services.

The main highways through towns and villages should be clearly marked, and the location of such utilities as the post office, the telephone exchange, telegraph office, auto camp, prominently indicated.

Above all, courtesy should be the watchword of every citizen. It should be remembered that they are strangers you are entertaining in your midst. What to you is commonplace, is to them strange and new. They desire information; then go out of your way to supply it. Make them realize how welcome they are so that, when they depart, if they carry away no other impression, they will at least, remember your town as one where the people were cordial, kind and helpful.

The millions of dollars that are being expended on highways is your money. Its expenditure is designed to benefit you and your community directly and indirectly. Make the most of it. This you can only do by individual and community co-operation.

### A Modern Fog Alarm

#### Partridge Island Signal Derives Power From Diesel Engines

The Partridge Island light and fog signal station at the entrance to St. John, N.E., harbor, said to be the first steam-operated fog alarm in the world, will in the near future derive its power from modern semi-Diesel

engines. In adopting this modern power the station may again lay claim to priority, for it will be the first of the kind in Canada. Other stations depending on oil engines have only internal combustion motors utilizing gasoline as a starting mixture and operating on kerosene as a regular fuel. The light on Partridge Island was established in 1791, and the fog signal in 1859.

#### Synthetic Bee Stings

Perfection of synthetic bee stings has been announced by the medical laboratories of Vienna, Austria. Professors of the Polyclinics hospital made chemical analysis of bee venom and claim to have succeeded in duplicating and improving it. The stinging chemical is said to cure rheumatism.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

#### A Remarkable Record

To cross the Atlantic twice every year on the White Star liner "Baltic," ever since the steamer began service more than 25 years ago, is the record of Mrs. M. C. Wilcox, 88-year-old resident of Larchmont, N.Y., who has arrived at Halifax on her 55th crossing. Her first ocean trip was made on the maiden eastbound voyage of the "Baltic."

The early bird gets the worm, but, unhappily, the too early bud gets the frost.

## YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

W. N. U. 1834

### Not Properly Qualified

#### Toronto Professor Says Universities Not Equipped To Study International Relations

Canadian universities are not sufficiently qualified for an adequate study of international law and international relations, Prof. Norman MacKenzie, of the University of Toronto, told the House of Commons committee on industrial and international relations. He knew of no university in Canada, he said, which had a library equipped for the intensive pursuit of these studies.

The committee was considering a resolution sponsored by Miss Agnes MacPhail (Prog. South-east Grey), calling for the establishment of chairs and scholarships of international relations in Canadian universities. There was a field in Canada for improvement in this respect.

Prof. MacKenzie thought parliament might well consider aiding either by grants or other means.

If the libraries were available Professor MacKenzie thought, the studies would be developed by the universities and the students themselves.

Another suggestion he advanced was that competent professors and students in Canadian universities be given greater opportunities to observe the operations of international business.

### ST. VITUS DANCE SUFFERER MADE WELL

#### Nerves Strengthened Through the Use Of Dr. Williams' Pink Pills

Time after time cases are brought to the notice of the public where sufferers from nervous troubles have been relieved by Dr. Williams' Pink Pills—where victims of St. Vitus Dance have been made well through the use of these pills after other medicines have failed to be of benefit. The reason for this is that Dr. Williams' Pink Pills act directly upon the blood—they make new, rich red blood and in thus banishing all impurities from the blood strengthen the nerves and make St. Vitus Dance impossible.

Mrs. P. Donnelly, Montreal, Que., is one more grateful mother who wishes to add her testimony to those already published. She says:—"My little girl, aged eleven, was a great sufferer from St. Vitus Dance. Several doctors prescribed for her without benefit. She was in the hospital for two weeks—still no benefit. I then saw an advertisement recommending Dr. Williams' Pink Pills for St. Vitus Dance, so decided to try them. My little girl had only taken a couple of boxes when I noticed some improvement so I continued with the treatment till now she is completely free from the trouble and can enjoy herself as other children do. I can highly recommend Dr. Williams' Pink Pills to anyone suffering from St. Vitus Dance or any other form of nervous trouble, for what these Pills have done for my daughter I am sure they will do for others."

Dr. Williams' Pink Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

#### The Modern Wolf

The wolf that used to sniff around the door now occupies an easy chair in the parlor, right next to the radio, and within easy reaching distance of the iceless refrigerator, the vacuum cleaner, and other necessities of life.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

In spite of all jokes, figures prove that Englishmen are more saving than Scots.

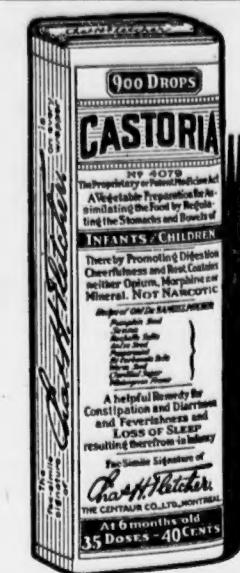

The name April is derived from a Latin word meaning "to open."

### Changing Seasons

Brings colds and other sickness. Keep Minard's in the medicine chest. It's a great preventative.

## Children CRY for it

the child grows older. If you want to raise boys and girls with strong systems that will ward off constipation, stick to good old Castoria; and give nothing stronger when there's any irregularity except on the advice of a doctor. Castoria is sold in every drugstore, and the genuine always bears Chas. H. Fletcher's signature on the wrapper.

### Strikes In Canada Decrease

#### With One Exception Last Year Most Peaceful Since 1902

With one exception, 1929 was the most peaceful year in Canadian Labor since 1902, the number of workers affected by strikes and lockouts falling to 12,924, and the days lost to 153,936. Steady progress toward happier relations between employer and employee has been registered now since 1922, the number of workers affected being as follows: 1922, 41,050; 1923, 32,868; 1924, 32,494; 1925, 25,796; 1926, 24,142; 1927, 22,683; 1928, 18,238; 1929, 12,924.

The figure for last year was only nine per cent. of the 1919 total, the year of the Winnipeg strike. Toronto figured in three of the minor strikes of the year. The painters' strike involved 600 workers, and lasted 38 days, the time loss being 7,800 working days. The plumbers' strike involved 400 workers, lasted 19 days, the time loss being 7,500 days. The plasterers' strike involved 500 workers for 12 days, causing 6,000 days' time loss.

#### Thermometers Tested Yearly

Every year, the Physical Testing Laboratory of the Topographical Survey, Department of the Interior, tests several thousand clinical thermometers for Government departments or for the general public. A certificate is given with each thermometer, which successfully passes the required tests.

### New Industry For Canada

#### Eighteen Varieties Of Soybean Can Be Cultivated In Dominion

Canadian farmers are finding a new opportunity in the cultivation of the Soybean. During 1929 soybean oil and other products to a value of nearly \$2,000,000 were imported by Canadian industries. Experimental work conducted by the Dominion Department of Agriculture shows that eighteen varieties can be successfully cultivated in Canada. It grows under essentially the same conditions as corn, and generally speaking, can be grown anywhere corn grows, and with about the same results.

## Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just 15c at all drug stores. When perfect dyeing costs no more—is so easy—why experiment with make-shifts?

### Diamond Dyes

Highest Quality for 50 Years

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from stalting.

Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

ternoon each week.

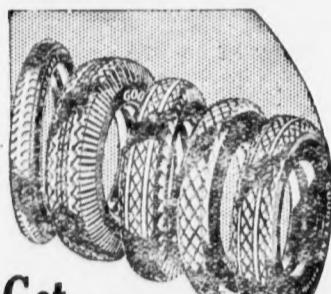

EDOUARD J. ROULEAU,  
Editor and Publisher

IT'S APPEAL IS UNIVERSAL

Some more than others, but all to  
a degree, like to wander through the  
stores. Man has been doing it so long  
it seems almost instinctive. Perhaps  
the explanation for the universal ap-  
peal of the store counters lies in an  
innate love for possession and of an-  
ticipation of possession. People are  
forever window-shopping, looking ar-  
ound the store with all the breath-  
less expectancy of children of Christ-  
mas eve. They want something which  
they hope sometime to find in their  
price, or they are just interested in  
the things man is creating for man.

Not less irresistible is the newspaper  
with its columns of advertising. In  
these columns are found the same  
wonders and coveted merchandise  
that are found on the store counters.  
Only the "catalogue and counter"  
combined in the newspaper advertising  
pages offer some advantages pec-  
uliar to themselves.

Every day millions of people the  
world over pursue the newspaper ad-  
vertisements to inform themselves on  
the progress of civilization, on new  
comforts made available to mankind  
on the fashions and vogues of the day,  
on where to buy the best of what  
they want at the most advantageous  
price, and furthermore for the same  
reason that they read the front page,  
the feature sections and the sports  
news—because they are interested.

Get  
those new tires  
for this week-end

DON'T spend this week-  
end by the road-side.  
Spend it on the road!  
Come in right now and  
we'll fit you out with the  
new tires you need. We've  
got Goodyears in wide  
variety as to size, tread  
and price. But all offer  
the biggest value for the  
money. Our service in  
putting them on your  
wheels and seeing they  
are properly inflated is  
free.

TOO MUCH LAW

Once Hayseed Centre seemed to face  
a future high and fine; though small,  
it was a bustling place, with filling  
stations nine. It stood upon a travelled  
trail that ran from east to west, and  
tourists with abundant kale stopped  
there to buy the best. The merchant  
princes of the town smiled gladly as  
they wrought, for tourists paid the  
money down for everything they bou-  
ght. Each year the traffic waxed apace  
and Hayseed Centre thrived, until a  
justice of the place schemed out a  
Treasure Trove. His trusty constable  
he called and said to him, one day,  
"No doubt that you, like me, are gal-  
lled, so much coin gets away. Now  
pinch for speed those tourist gents.

and I'll impose a fine of fifteen bucks  
and forty cents and make them toe  
the line. Thus may we punish those  
who knock the statutes with disdain,  
and put a bundle in the crook against  
the day of rain." Then every day  
some wights were nailed while tooling  
their machines, and to the bar of justice  
haled, and taxed some fifteen  
beans. The word went forth along the  
pike that leads from east to west;  
the word went forth to Pete and Mike  
and Jake and all the rest. "Avoid that  
village" was the word that went a-  
long the lines; "It has a crooked jus-  
tice bird who waxes rich on fines."  
Now Hayseed Centre's dull with rust,  
it shrivels and it shrinks; no tourists  
stop for drinks. The autos take another  
road that lies five miles away;

and on that Justice are bestowed dark  
curse every day. This truth advances  
through the states, and to the farthest  
land—the stranger who's within our  
gates should not be promptly skinned.

ALBERTA LEGISLATURE, 1930

The synopsis of important acts pas-  
sed at the recent session of the legis-  
lature, compiled and arranged by John  
D. Hunt, clerk of the Executive Coun-  
cil, has been completed and copies  
are available.

This work, commenced years ago by  
Mr. Hunt as a labor of love, has come  
to be regarded as a valuable contribu-  
tion to current legislation and legal

information.

Some 3500 copies are being printed  
and requests have been received for  
copies from London, England, Toronto,  
Montreal, Ottawa, New York and  
many other points.

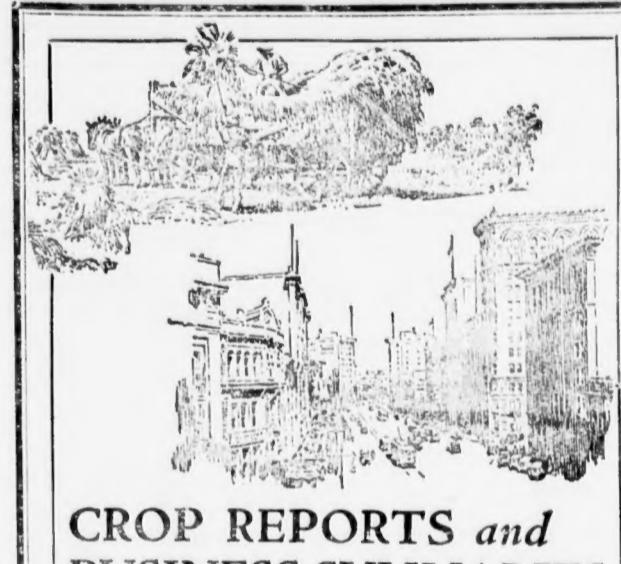

Alberta is the only province issuing  
such a synopsis.

"Mother sent this steak back. She  
says it's so tough that she could sole  
our shoes with it."

"Why didn't she?" was the surly re-  
ply.

"The nails wouldn't go through."

## CROP REPORTS and BUSINESS SUMMARIES

DURING the season the Bank of Montreal  
issues periodical reports on crop conditions  
throughout Canada.

Every month it publishes a "Business  
Summary" covering business conditions  
in the Dominion and in the countries  
where the Bank has offices.

Both of these publications are sent free to all who  
request to have their names placed on our mailing list.

## Dry, Burning Throat Made Life Miserable

Have You These Symptoms?

"For three years I was seriously bothered by a bronchial cough. At night I would awaken with a dry irritable feeling in my throat. I couldn't cough up anything but very soon my throat got into quite an inflamed condition. Once I got CATARRHOZONE INHALER I was all right. I took it to bed, and if an attack awakened me the inhaler gave me relief. Catarrhozone has restored me and I strongly urge every one with a weak throat to use it regularly." — (Signed) J. B. Beamer, Reading.

Catarrhozone will not disappoint you. Get the complete \$1.00 outfit; it's guaranteed. Small size, 50c. At dealers everywhere.

**Catarrhozone**  
A Ten-Minute Relief!

## WORLD HAPPENINGS BRIEFLY TOLD

The 900th anniversary of the Speyer cathedral will be celebrated on July 12, 13 and 14 of this year.

Summer time in England went into effect at 2 a.m. April 13, and clocks were set one hour ahead.

Pilot Mermoz broke the French duration record in a seaplane, landing after thirty hours, twenty-five minutes and forty seconds in the air.

The salaries and expenses of the pensions appeal board of Canada last year were \$45,100 in excess of the awards they had made.

Production in the cotton and jute industry of Manitoba for 1928 amounted to \$5,043,413, which is a little more than one-fifth of the total production for Canada.

Kaye Don, British automobile racer, has definitely abandoned his plans for attempting to beat the world's automobile speed record at Daytona Beach, Florida.

Marquis still constitutes more than one half of the western grain crop, growing tests of samples taken from forty-eight cargoes of Canadian wheat exported to England in 1928-29 show.

**Strangled With Asthma** is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

### Portage la Prairie Exhibition

At a meeting of the Portage Industrial Exhibition Association the other day, a plan was submitted and approved for the construction of a new building for the housing of fine arts and domestic manufactures. It is hoped to have this building in readiness for the fair this summer.

**"NO MORE STOMACH TROUBLE"**  
"No more stomach trouble. Can eat anything," writes Mrs. E. White. "Thousands say indigestion, heartburn, gas vanish like magic with 'Fruit-a-lives'. Constipation, sick headaches end overnight. Nerves, heartquiet, sound sleep at once. Rheumatism flies away. Complexion clears quick. Get 'Fruit-a-lives' from druggist today."

W. N. U. 1834

### Elevator Operators

#### Must Accept Grain

##### Storage Reservation Not Permitted Under Clause In New Act

Elevator operators are compelled to take in grain submitted to them by farmers when they have accommodation for it under a clause in the new Grain Act, approved by the committee on agriculture and colonization. They are not to be permitted to reserve storage space for customers in advance; but must take in grain as it is offered as long as they have room.

Discussion of this provision raised the question of the discretion of the elevator operator to refuse damp or smutty grain. Some members of the committee thought they should not be required to accept grain unsuitable for storage, thereby tying up storage facilities and preventing the movement of good grain. This question was left to stand over until a section covering it could be prepared and submitted to the committee.

### KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and thus drive out constipation and indigestion; break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes:—"I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Rubber Overshoes For 'Planes

#### Lace Over Wings and Prevent Formation Of Ice

Overshoes for aeroplanes—a new method of keeping wings free of deadly ice—were announced at Cornell University, Ithaca, N.Y.

They are a discovery in safer flying announced as a result of "successful tests" in the mid-west.

The overshoes lace over the forward edge of the wing. They are a thin layer of specially vulcanized rubber exuding continually a colorless oil which is the secret of the success. It is announced that the ice does not stick nor the oil "scrub off."

This slipperiness alone is insufficient and so the overshoes have a small hose under their striking edge. A slight pulsation of pump driven air in this hose breaks the ice as it forms on the wing edge, and so prevents air from pressing the forming ice fast against the wing.

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

### London's Busiest Woman

Known as London's hardest-working woman, Mrs. Alice Tabrahams, a widow, has just announced that she will retire, after 25 years of public life. In the morning she works as scrubwoman in the offices of the local Labor Party; in the evening she presides over the Edmonton Education Committee or attends the Urban District Council, of which she is a member. In addition she does all her own housework and cares for the children. She says she needs a rest.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

"Willie, didn't I tell you to shut that shutter?" said Willie's mother.

"The shutter's shut," replied Willie, "and I can't shut it any shutter!"

Eight ambulance airplanes now operate through the Sahara Desert.

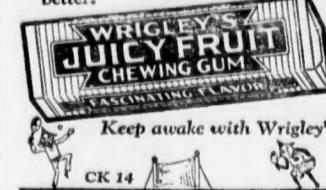

Minard's is Best for Grippe.

**WRIGLEY'S**

When you need new energy, when you are hot and mouth is dry—pop up with Wrigley's—it moistens mouth and throat.

The increased flow of saliva feeds new strength to the blood, you can do more—you feel better.

Keep awake with Wrigley's

### University Students In Canada

#### 56,042 Students Enrolled At the End Of 1928

Students doing work of university standard and taking matriculation courses in Canada at the end of 1928 totalled 56,042 of whom about 20,900 were women. Of the total 40,987 were full time students, 3,813 part time and 11,603 vacation short course and extension students, 361 being duplicates enrolled in more than one category.

There are 23 universities in Canada, of which six are state controlled. The total teaching staff of universities numbers 4,078, of whom 3,544 are men and 534 are women.

In all the educational institutions of Canada the enrolment totals 2,342,391, of which 2,054,298 attend publicly controlled kindergartens, elementary and secondary schools.

### Smothering Spells

#### Couldn't Walk Far

#### Gasped For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath.

"A friend told me to try

which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

### Everybody Satisfied

#### Family Could Enjoy Reading Paper By New Method

The latest invention is a machine which reads aloud from the printed page. This should prove a boon to the army of men who have to hurry to work in the morning. They could get their morning paper, set the machine going while they whistle in the bathroom, take it to breakfast and let it run till they bid good-bye to their superiors halves at the front door, by which time they would have heard the chief news. Then the paper could be left for the ladies of the household to read the shop advertisements, the social news, etc. The whole house would be satisfied.—Montreal Gazette.

### Where Canada Leads

Canada is the largest exporter of wheat among the countries of the world and the second largest exporter of flour, being exceeded only by the United States.

### SUNDAY SCHOOL LESSON

APRIL 27

#### EASTER LESSON

Golden Text: "He is not here; for He is risen."—Matthew 28:6.

Lesson: John 20:1-16.

Devotional Reading: Ephesians 1:15-23.

#### Explanations and Comments

Mary Magdalene's Discovery Of the Empty Tomb Of Christ, verses 1, 2.—A stone had been placed over the entrance of the tomb in which the body of the crucified Saviour had been laid (Mark 15:46), and the stone had been sealed in a groove at the base of the opening of the tomb. Early on Sunday morning Mary Magdalene came to the tomb with the others, as the "we" in the next verse indicates. She found the stone removed. At once she hastened to tell Peter and John (John always refers to himself in his Gospel as "the disciple whom Jesus loved"). "They have taken away the Lord out of the tomb, and we know not where they have laid Him," she cried.

John's and Peter's Discovery Of the Risen Lord, verses 3-10.—Peter and John ran to the tomb. John reached there first, and looking in reverently and wonderingly where the Saviour's body had rested, he beheld only the linen clothes in which it had been wrapped. Then impetuous Peter rushed into the tomb and saw a wonderful thing: the linen clothes which had enveloped Christ's body were rolled up, and the napkin, which had been about His head, was in another place. Leisurely and orderly had been Christ's departure; had others carried off His body, the grave clothes would not have been left. Then John also entered the tomb, and the sight sufficed him; he believed that Christ was risen. "What was it that John believed? That Jesus had risen? Surely this, but further, that as He had risen, He was therefore the divine Son of God. The conviction then produced was the origin of his Gospel, the source of a life of loving devotion for the apostle John."—C. R. Erdman.

Mary Magdalene's Discovery Of the Risen Lord, verses 11-16.—Mary, who had followed Peter and John back to the tomb, remained outside, weeping. Looking into the tomb she saw two angels clothed in white and sitting where the body of Jesus had lain. The Greek word for "angel" means "one who is sent with a message," and their message for Mary was, "Woman, why weepest thou? Whom seekest thou?" There was no cause for weeping, but great reason for rejoicing.—The Lord had risen!

"John's insight taught him first to conclude that his Lord had risen; May's want brought her Lord first to satisfy it," for as she turned she beheld Jesus standing. But she did not recognize Him. The synoptists (Matthew 28:17; Mark 16:12; Luke 24: 16, 37 and John in 21:4), speak of His form as altered; Mary's eyes, moreover, were dim with tears. "Woman, why weepest thou, whom seekest thou?" Jesus questioned.

Supposing Jesus to be the gardener, or garden-keeper, the only one who would naturally be there at that hour, Mary said to him, "Sir, if thou hast borne Him hence, tell me where thou hast laid Him, and I will take Him away." How natural it was that she did not mention Jesus' name: there could be no one else thought of.

"Mary," said Jesus, and "Rabboni," Teacher, she cried. "It was only an instant's work, but all the quick emotions of a life-time were endured. That voice! In a flash the cross was forgotten, the tomb forgotten; the mystery of how the dead could live again was unthought of. 'Mary!' 'Master!' Deep called to deep, and the testimony of the inner spirit defied all logic and all contradiction. 'I know that my Redeemer liveth.'"

**Fresh Supplies In Demand.**—Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put in most portable shape in bottles and can be carried without fear of breakage.

#### Dogs Have Rights

Because he drove his car over a Boston bulldog, Robert Miller, of Hamilton, Ont., was found guilty of cruelty to animals. He was allowed out on suspended sentence, but must make good the value of the deceased animal, which was \$60. Magistrate Burbidge ruled that dogs are entitled to the same consideration on the street as pedestrians.

#### A Model Community

In the town of New Lanark, Scotland, established as a model community by Robert Owen, there were no lawyers or magistrates and not a legal punishment during a period of nearly 30 years.

### Sodium Sulphite Deposits

Over One Hundred Million Tons Of Natural Hydrous Salts Found in Saskatchewan

As a result of investigation made by the Canadian Government Department of Mines, it has been established that the sodium sulphite deposits in the Province of Saskatchewan contain over 100,000,000 tons of natural hydrous salt. These deposits have been looked on as of great potential value not only to meet commercial requirements in Canada but because of the possibility of developing important export markets. One of the important uses in Canada is in the pulp and paper industry where large tonnages of the anhydrous sodium sulphite or "salt cake" are used in the production of sulphate or kraft pulp.

#### Minard's for Falling Hair

#### Along the Frontiers In Manitoba

Manitoba May Develop Salt Water Fishing At Churchill

Manitoba, with Churchill as its seaport, has assumed the status of a Maritime province, and development of an extensive salt water fishing industry is one of the possibilities in the near future. Hon. D. A. McKenzie, Minister of Mines and Natural resources, prophesied such an industry during an address in Winnipeg. He had been informed by those qualified to speak that there was every prospect of good fishing being conducted on a large scale, with Churchill as the base for the fishing fleets.

### Treat Colds 2 Ways With One Treatment

RUBBED ON throat and chest, Vicks does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

#### King Buys Stamp Collection

King George V., who is an ardent stamp collector, has purchased the famous Purves collection of Australian stamps, which was awarded the gold medal at the 1928 international philatelic exhibition at Melbourne. The price is believed to have been two thousand pounds. The collection contains examples of all issues, many of which are unique.

### WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotsches on the face, eyes with yellow tinge and that tired and languid feel? This indicates a torpid liver.

Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming.

## PROPORTIONAL REPRESENTATION VOTING SYSTEM

Ottawa, Ont.—Proportional representation, which now is occupying the attention of the administration and of the opposition members as well, is not a new subject in Ottawa. In the House of Commons a few days ago, Premier Mackenzie King intimated the government is giving the matter consideration and said the progress made during the session will determine whether or not a bill is introduced.

In 1921, a committee of the House investigated "P.R." The committee recommended taking a plebiscite because it was "not prepared to recommend the application in the next general election." The committee was impressed by the arguments presented by the advocates of the system and in its report said:

"It must be apparent that the present system of elections in single-member constituencies meets fully the purpose intended only when no more than two candidates are nominated. Recent experiences in elections in Canada have brought home to our people the fact that when three or more candidates present themselves in single-member constituencies, the candidate declared elected may, and often does, represent merely a minority of those voting in the constituency."

It was after the 1921 election that a debate and division took place on the report. W. C. Good, Progressive member for Brant in 1923, introduced a motion calling for the adoption of "P.R." in multi-member constituencies. Practically all the then leaders took part in the debate and in the division that followed, the motion was lost. Among those who voted for it were Premier MacKenzie King, Hon. W. S. Fielding, and Hon. Ernest Lapointe, Minister of Justice. Right Hon. Arthur Meighen then leader of the Conservative party led the forces opposed to the motion although party lines were not followed rigidly in the division. Hon. Lucien Cannon, solicitor-general and Hon. James Malcolm, Minister of Trade and Commerce, were two of the present cabinet ministers who voted in opposition to the motion.

### Canadians Well Informed

**Are Acquainted With Public Affairs Says Lord Willingdon**

Vancouver.—The difficulties of a governor-general who is being constantly asked to deliver addresses and yet is surrounded by limitations in what he may say, were good-humoredly referred to by His Excellency Lord Willingdon in addressing a luncheon of service clubs here.

Speaking of the work of service clubs and of the opportunity they offered for the study of public affairs, Lord Willingdon expressed his opinion "that the citizens of Canada are perhaps better informed on public affairs than citizens of any other country. I wish that in my country we had more of these organizations so that the citizens of my country would know more of empire affairs than they do now."

### Plans Return Next Year

**Kaye Don Faced Many Difficulties In Trial For Speed Record**

New York.—Kaye Don's first attempt to smash the world automobile speed mark on the sands of Daytona Beach is over but the dapper little Englishman with the bristly blonde mustache will be back again for another go at it next year.

It has been anything but a pleasant expedition for the debonair king of Britain's amateur tracks who set forth like a schoolboy on a holiday two months ago to crack Sir Henry Segrave's mark of 231 miles an hour in the massive Silver Bullet built especially for him by the Sunbeam Motors of England. Twenty-two times Don battled a set of coughing motors and the unusually rough Daytona sands without coming closer to the record than 198 miles an hour.

A new electrical device can be used to seal broken blood vessels.

W. N. U. 1834

### Predicts Early Election

**May Be Held This Year, Says Hon. R. B. Bennett**

Calgary.—"All appearances point to the calling of a Dominion election before the end of the present year," asserted Hon. R. B. Bennett, on his return to Calgary following adjournment of the Federal House for the Easter recess.

"I notice that one of the government supporters in Edmonton has fixed the date on which an appeal will be made to the people, but I doubt if the Prime Minister himself has yet determined that point.

"The budget will probably be delivered shortly after the Easter recess," Mr. Bennett continued, "and there is much conjecture as to what it will contain. Undoubtedly promises have been made to the agriculturists of Quebec that a tariff will be imposed on fruits and vegetables, and the iron and steel producers have been assured that their industry will receive protection under the new tariff.

"The action of Australia in imposing a supertax to practically prohibit the importation of many commodities is justified by the Australian Government as the Canadian Government imposed a dumping duty of six cents per pound on importation of butter from Australia after a treaty had been signed between Australian and Canadian Governments agreeing to a duty of one cent per pound on these imports. The whole problem of Australian trade is engaging the attention of the government at the present time."

### Tariff Commissioner Retires

**Fellow-Workers Of J. A. Russell Hold Banquet In His Honor**

Ottawa, Ont.—Warm appreciation of the faithful and efficient service which he has given to the Dominion over a period of more than half a century was voiced at a banquet given in honor of James A. Russell, retiring commissioner of tariffs for the department of finance.

The event was signalized by the attendance of friends and fellow-workers of Mr. Russell, from the department of finance, the department of national revenue, the tariff advisory board, and the department of external affairs, who gathered at the Royal Ottawa Golf Club to do honor to the retiring commissioner.

After serving the country for fifty-three years, during which time he was associated with six finance ministers, Mr. Russell now retires on pension under the seventy-five year age provision.

### Trouble In British Textile Mills Growing

**Workers Fighting Wage Reduction Employers Deem Necessary**

London, Eng.—Day by day the prospects of a long stoppage of work in the woolen and textile industries seem to be growing and it is now feared—unless the government steps in—the country must face a long and bitter struggle between the men and women who will not accept wage reductions and the employers who, acting on the report of Lord McMillan, deem such reductions necessary to the continued existence of the industry.

Today the General Trades Union congress appealed to its affiliated trade unions for financial assistance for the Yorkshire workers. The general council itself headed the list with a contribution of five hundred pounds, or about \$2,435.

### Dirigible To Span Atlantic

London, Eng.—The British dirigible R-100 will attempt to bridge the Atlantic this spring, the first step toward the British dream of an air-linked empire. Meanwhile the Graf Zeppelin will start on its sixth trans-Atlantic trip. The United States, focal point of former air lines crossings, will be neglected, for the R-100 will point for Canada and the Graf for South America.

### Thousands Acres Sown

Lethbridge, Alberta.—O. B. Lassiter has completed sowing 1,000 acres of wheat in summerfallow. Several farmers of the Bow Island district have finished wheat seeding. The recent rainstorm is the cause of much jubilation by these farmers.

### ANGLO-CANADIAN COMEDIENNE

Beatrice Lillie, the vivacious Anglo-Canadian comedienne, is now in Hollywood preparing to make a talkie. She is the wife of Sir Robert Peel.

### Britain Acts On Liquor Shipments

#### Will Introduce Bill To Safeguard Interests Of U.S.

London, Eng.—The House of Commons, by a vote of 215 to 142, gave a Liberal member leave to introduce a bill to entitle the board of trade to suspend or cancel the certificate of any master, mate or engineer engaging in the illicit importation of intoxicating liquor into United States territory.

After Isaac Foot, Liberal member from Cornwall, had spoken for ten minutes advocating the measure, Frederick A. Macquisten, Conservative member from Argyll and a lawyer who sometimes acts professionally for the liquor trade, opposed the bill in a speech filled with humorous remarks.

Lady Astor, United States-born peeress and ardent temperance advocate, interrupted Macquisten several times.

### Night Editor Of Calgary Herald Dead

#### P. W. Stone Was Well Known Throughout Canada

Calgary.—Percy W. Stone, for more than ten years night editor of the "The Calgary Herald" and known from coast to coast as one of Canada's veteran newspapermen, died April 15, following a heart attack. He was 54 years of age. Prior to becoming associated with "The Herald," Mr. Stone worked on "The Winnipeg Telegram," and later became editor of "The Bassano Mail," and managing editor of "The Crag and Canyon" in Banff.

Mr. Stone was an Englishman by birth, but came to Canada as a boy and taught school in Ontario before coming west.

#### Slowing Up Naval Program

Paris.—Information available in authoritative French circles is to the effect that France will slow up her naval building program despite the fact that she will not participate in the hoped-for comprehensive five-power naval pact.

### Canadians at White House

Hon. Vincent Massey, Canadian Minister to the United States, accompanied E. W. Beatty, chairman and president of the Canadian Pacific Railway, on a visit to President Hoover recently. They are here seen leaving the White House in Washington.

### Establishes New Speed Record

#### Pilot Buchanan Makes Fast Flight From Winnipeg To Regina

Regina.—A flight from Winnipeg to Regina in two hours and 45 minutes, establishing a new speed record for that leg of the Western Canada air mail service, was made by Pilot W. J. Buchanan on April 13, in a Fokker F-14 machine.

He left Winnipeg at 9:05 p.m. (Winnipeg time), or 8:05 p.m. Regina time, and arrived here at 10:50 p.m. (Regina time).

There was a 25-mile an hour wind blowing from the southeast during most of the flight, but unfavorable weather made it necessary for him to "fly blind" from Broadview to Regina. The total distance is 330 miles.

### Surveyed Air Mail Routes

#### Superintendent Of Airways Returns To Ottawa From West

Ottawa.—Making a two-day stop-over flight from High River, Alberta, to the capital, Squadron Leader J. H. Tudhope, superintendent of airways for the civil aviation branch, has returned from a survey of air mail routes in Western Canada. The return flight of approximately 2,208 miles was made in 17 hours and 50 minutes flying time. Five stops were made.

Major Tudhope's survey had as its purpose an investigation of possible routes for the final links in Western Canada of the trans-Canada Air Mail Service, to be completed in the near future.

### Keeping Up Record

#### World's Champion Egg-Laying Hen Still Leads In Production

Saskatoon.—Lady Victorine, world's champion egg-laying hen, is doing very well in her second year. When this Barred Rock pullet, who lives at the University of Saskatchewan, completed her first year of egg production, during which she laid 358 eggs, she did not moult immediately but laid another 16 eggs last September.

Towards the end of December she resumed business, laying four eggs in that month. In January, February and March she worked steadily and produced as many eggs as the average Saskatchewan hen does in a year.

### Impressed With Bay Port

#### Development At Churchill Was Surprise To Premier Bracken

The Pas, Man.—Churchill will probably not be thrown open to the public this year is the opinion of Premier John Bracken, who has returned from his first visit to the northern seaport.

Mr. Bracken stated it would seem unwise to open it to the public as no provision has as yet been made for public utilities other than those for the government men who will be employed there this year.

Premier Bracken stated he was impressed with the magnitude of the development at Churchill.

### MANY INJURED DURING SERIOUS RIOT IN INDIA

Calcutta, India.—Nineteen persons were injured in heavy fighting between Nationalists and police in the Bhowanipore Sikh quarter of Calcutta. Tram cars were burned in both Calcutta and Bombay and armored cars patrolled the streets of the latter city when students and carters joined in the attempt to stop vehicular traffic by obstructing road-ways and tram-lines.

Six European officers were among the injured at Calcutta. A European woman cycling in the district, was forced to dismount and abandon her machine when she was stoned by the crowd. She received nasty gashes. Ten Khalasias were injured.

There were unconfirmed reports of firing in North Calcutta. Armed police were on duty throughout the affected area and armored cars were active.

Seven British officials were injured by the time the situation was brought under control. Two members of a South Calcutta mob were injured when a European police sergeant opened fire to save an injured fellow-officer who was being attacked. A fireman suffered a fractured skull when he was attacked by a crowd opposing his efforts to extinguish a tram-car blaze.

Miss Daisie Dench, London girl, who attempted against police advice to ride a motorcycle through a riot section, was taken to a hospital with deep gashes from stones which the hostile mob flung at her. Her way was blocked and she had to run for her life amid a hail of broken road material.

### Will Not Seriously Affect Canadian Trade

#### Chancellor Of Exchequer Announces Tariff Changes In British House

Ottawa.—Tariff experts of the Dominion Government are busily studying the tariff changes announced by Rt. Hon. Phillip Snowden, chancellor of the exchequer, in the British House of Commons. The general opinion expressed is that they will not seriously affect Canadian trade. The fact that the McKenna duties remain on motor cars, motion picture films and musical instruments is most important.

The removal of the McKenna duties would have wiped out the advantage which Canada now has over the United States in the British market and the products would be allowed in free from both countries. According to information here based on Mr. Snowden's announcement, the first of safeguarding duties which will pass out of existence is that on lace and embroidery. This duty was put on for five years and would end on July 1 next. As Canada does not export this product it will not affect her. The duty on cutlery comes off on December 22 next.

### To Cut Grain Acreage

#### Special Survey Discloses Substantial Reductions In North Dakota

Washington, D.C.—Governor George F. Schafer, of North Dakota, and John L. Coulter, chief economist of the tariff commission, told Chairman Alexander Legge that substantial reductions in both hard and soft spring wheat acreages may be expected in North Dakota and neighboring areas covered by a special survey made by Coulter.

The eastern section of North Dakota, the chairman said, is expected to reduce its acreage of Durum wheat more than the 15 per cent forecast by the Department of Agriculture. The reduction of hard spring wheat in the western section will be less, but of considerable importance.

#### Boys Killed In Fire

Lucata, Sicily.—Fifteen boys, ranging in ages between 15 and 18, were killed in a moviehouse fire and stampede. A general rush for the exits, following outbreak of fire in the film room, was the cause of the fatalities. In addition, three others were seriously injured and five were slightly hurt.

## Recreational Resources of Canada Compose a Loadstone Which Draws Millions Of Visitors

Canada's recreational resources are a national asset of the first order. They compose the lodestone which each year draws millions of visitors to the Dominion and they form a source of wealth which annually adds a large and rapidly growing item to the national income. There are, in fact, few records in the annals of Canadian development more interesting or more remarkable than that of the rise to importance of the Dominion's recreational features.

Some idea of the extraordinary growth of holiday traffic may be gained from the records of touring automobiles entering Canada in recent years. In 1919 the number of cars entering Canada for touring purposes was 238,000 and during the ten years up to 1929 this figure had increased to 4,509,000. Aside from the phenomenal increase of motor tourists, railway and steamship lines each year add large numbers to the thousands who holiday in Canada. Tapping an even wider field than the automobile, these organizations have spread the Dominion's fame as a holiday land literally throughout the world.

The most casual traveller crossing the Dominion from east to west cannot but be struck by the sheer diversity of Canada's natural features. First there is the rugged Atlantic shore; then the great system of inland lakes, seas in depth and size; next a thousand miles of rolling prairie; followed by the great barrier of the Rockies, rivaling the Alps in grandeur; and finally the sea, bathing with its warm waters the far-flung Pacific coast. All these contribute to the glorious panorama of a transcontinental trip across Canadian territory.

The charm of the Maritime Provinces is not easily depicted. These provinces—Nova Scotia, Prince Edward Island, and New Brunswick—are toned with the mellowness of age that captivates the visitor from newer regions. The snow-white lighthouse crowning the cliff that overlooks the sea, the white sail of the fishing smack seeking its sheltering cove, the quaint fishermen's cottages that straggle up the hillsides, the shaded inland roads and winding forest streams, the springtime mantle of blossom that clothes mile upon mile of orchard valleys—all these suggest the elements that blend to give the Maritimes a picturesqueness peculiarly their own. In this setting is found all that goes to complete the happiness of the holiday visitor—excellent facilities for motoring, boating, fishing, hunting in season, and all outdoor recreation.

Reaching from the Gulf of St. Lawrence to the head of Lake Superior, a voyage of 2,000 miles, one of the world's great systems of interior waterways traverses Eastern Canada. Nowhere exists an interior water route more varied than that traversed in a trip up the storied St. Lawrence, touching at historic Quebec and busy Montreal. Leading on through the Thousand Islands and the Great Lakes, past Toronto, Niagara Falls and a dozen other centres of commercial or scenic interest, such a voyage reveals the heart of Eastern Canada and leaves a vivid impression not only of the natural beauty but of the business life of this part of the Dominion.

The Laurentian region—the huge

"Why do you insist on a post-mortem examination after you are dead?"

"I want to know what I die of."—Muskete, Vienna.

W. N. U. 1824

horseshoe skirting Hudson Bay to the east, south, and west—is pre-eminently the country of forest and stream, of hunting, fishing, and canoeing, of great unexplored areas. Countless lakes and rivers form a network of dustless highways routing the canoeist through a hinterland where trout, bass and maskinonge, moose, deer and bear, stock a superb field for the sportsman.

The prairies are less familiar as a holiday region. Yet, for thousands of visitors, the fertile western plains with their endless miles of rippling grain present a scene of beauty and satisfaction to countless visitors. Beautiful summer resorts nestle on the shores of prairie lakes, and for the enjoyment of the sportsman few fields offer finer attraction than the hunting, in season, of prairie game birds.

For scenic splendour the Rocky Mountains have been declared by many experienced Alpine climbers to be unsurpassed. Majestic ranges, scarred by age and weather, rear their summits against sky of purest blue or bury their snow-capped peaks in fleecy clouds. Glaciers and waterfalls, emerald tinted lakes and wooded valleys combine to entrance the eye and the enchantment is increased by the alpine air fragrant with the scent of pine and fir. The mountains are noted for their big game—bighorn sheep, grizzly bear, Rocky Mountain goat, elk, deer, moose, caribou, black and brown bear, and mountain lion.

Canada's Pacific coast, with its fjords and inlets, is a revelation to the tourist. Its moderate climate makes it an all-the-year-round playground for thousands, while its hunting, fishing, and other sporting attractions are unexcelled on this continent.

Taking into account the scope, the variety and the steadily widening renown of the Dominion's recreational attractions, there is ample ground for the view that these natural assets will, through their direct and indirect commercial effects, prove to be one of the major forces of Canadian development in the next generation.

An average of 3,000,000 persons are ill in the United States every day.

Monkeys trained to operate them are used to try out new types of parachutes in Japan.

### SUGARING TIME

You can't fool these two youngsters about this spring business. When there is a sound of preparations in the maple bush, the fragrant scent of burning hard wood and glint of sap pails, it's a sure sign that spring is here. Here we see "Jack" and "Jill" who didn't need to go up the hill, and furthermore, it isn't water.

### Strange Blue Grass Thrives In Winter

#### Will Grow Under Adverse Conditions Without Cultivation

Experts from the United States Department of Agriculture predict that the strange winter blue grass discovered on an Oregon farm and believed by them to be the "lost grass" of Europe, may revolutionize farming and dairying industries.

The story of the grass is a farm romance. Similar to grass which disappeared in Europe a century or more ago, it dies down in summer, when other grass is green, but thrives in winter, when food for livestock is low. It forms a perfect turf, even under the snow.

Because the experts found it will grow under adverse conditions, without cultivation, and will thrive in rainy regions, they view it as a solution of the problem of utilizing logged-off lands of the Pacific northwest.

Seeds for use in the Pacific northwest will be sold exclusively in Seattle by the Children's Orthopedic hospital. The agency was a gift of Mrs. E. B. Hanley, on whose farm the seed was found, and will be a source of permanent income for the hospital.

#### Yellow Journals In Shanghai

#### People Have To Be Circumspect To Avoid Publicity

The Chinese business or professional man who strays from the straight and narrow path usually reads all about his sins in the papers.

A survey made recently by military authorities indicates that there are more scandal sheets in Shanghai than any other city in the eastern hemisphere and probably in the world. One hundred and ten yellow tri-weekly newspapers are published in the Asiatic metropolis and are all devoted to printing news not fit to print.

To keep these pages supplied with information concerning the doings of Chinese who are in the spotlight, a large army of Chinese scandal mongers is constantly kept on the job. They appear at the most amazing times and at the most inconvenient places.

#### For Improved Livestock

The first "Improved Sire Area" in Manitoba has been established in the municipality of Roland, according to an announcement made by Albert Prefontaine, Minister of Agriculture. Under the Improved Sire Area Act, all bulls, boars and rams must be inspected and approved before the owners of same are permitted to retain them for service in the area.

## The Present Market Condition Clearly Reflects Success Of Pool Says Professor Fay, of Toronto

### Queer Sight In Cuba

#### Trees Grow In Limestone Areas With Little Care

Huge trees growing without any visible means of support are one of the queer sights of the Zapata swamp of Southern Cuba, which is nearly 1,800 square miles in extent. Many varieties of trees, some 4 feet in diameter, are found growing in limestone areas where not so much as a single spoonful of soil can be gathered from an acre. The trees make a start in small pockets and holes in the limestone, where collections of leaves and disintegrated rock furnish them with cover for growth. In their search for food the roots stray about over the surface of the rock, finally plunging through holes to find sustenance in soil hidden deeply in the cavernous recesses of the coral stone.

### Winnipeg Newspaper Union

(By Annebelle Worthington)

Smart young things are including many silk crepe frocks in their Spring wardrobe to be worn with separate coat to carry out ensemble style.

The youthful animation of hem, makes this model especially attractive, for it is equally smart worn without a coat.

The cap sleeves of the yoked bodice are outstandingly chic in pointed treatment.

It is nipped in at normal waistline by narrow belt.

Style No. 2846 comes in sizes 14, 16, 18 and 20 years. In the 16-year size, 2 1/2 yards of 39-inch material with 1/2 yard of 39-inch contrasting is sufficient.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

A pineapple taken to London ahead of season by a sailor was sold for \$25.

The easier a girl is to look upon the harder a man will look.

The Canadian people have confidence in the Wheat Pool and the present condition of the market clearly reflects the success of the Pool, says Professor C. R. Fay, of the economics department of Toronto University. Professor Fay has just completed a survey of the western grain situation and will shortly proceed to England to examine the status of the Canadian Wheat Pool there.

"After my investigation I am a strong supporter of the Pool as it has functioned hitherto as a voluntary organization," he said. "There has been an attempt made in Saskatchewan to make it compulsory for farmers to sell their wheat through the Pool. I am strenuously opposed to that."

The fact that export trade was improving was another indication of improvement in the wheat situation, said Prof. Fay. Considerable attention was fixed on the American winter wheat crop. However, absence of rain there and only moderate improvements of exports have caused farmers to cease to worry on that score.

Talking over the general situation last year with both representatives of the wheat "trade" and the Pool, Professor Fay was convinced that North America had been most "bullish" in its wheat trading.

"Most emphatically the Pool was not holding out when the trade was selling," he said. "The Pool was offering wheat continuously all summer and fall at below Winnipeg prices in an effort to dispose of the wheat crop.

"But in order to compete with the unusual Argentine crop, it would have been necessary to sacrifice grain as low as 20 cents below the Winnipeg prices, which was unreasonable," he continued.

"The difficulty in 1929 was to move the limited quantity of high quality Canadian wheat to Europe, which was determined to depend on its own wheat crop. There is no question of a boycott of Canadian wheat," said Professor Fay. "The tariff wall in England and Europe is just a case of need of tariff protection for local growers against the cheaper Argentine wheat. The ban was not directed at Canadian wheat, but the higher grade grain has suffered, with the lower grade Argentine product.

"I wish to defend the Pool as a strong, stable organization, whose members are standing fully behind it. Even though many of the western farmers are so short of money that they have had to sell their seed grain in order to live, they are supporting their Pool," he said. "The division in Saskatchewan has died down and it is now less acute than in the period of low prices."

### Has Sunless Winter

Like Hammerfest in Norway, Prussia has a village upon which the sun never shines during the winter. The name of the community is Forstlangswasser, and it is located in the Giant Mountains. Two mountains shelter the village from the winter sun the whole day long, so that the village has nothing but twilight in which to do its work from sunup to sunset.

Heart disease, cancer and accidents claimed more victims in 1929 than in former years.

"Do you worry about your old debts?"

"No, I forget old debts."

"What about new ones?"

"I let them get old."—Hummel, Hamburg.

We have been asked by one of our subscribers to publish the following letter from O. S. Floyd, a one-time resident of the Grainger district. This letter was published in the Acme Sentinel last week.

**JAIL IS PENALTY FOR TAMPERING WITH GRAIN WEIGH SCALES**

Ottawa—Tampering with grain scales is to be punishable by imprisonment without the alternative of a fine. The term of incarceration is to be not less than six months. An amendment to this effect was passed at the House of Commons during consideration of the grain Act recently.

The reading of the amendment is that any person in control of grain scales on behalf of the licensee who refuses to allow the inspection of the scales shall be liable for the term of imprisonment mentioned. The clause as originally drafted permitted the

alternative of a fine, but several members of the committee were of the opinion that a fine would not meet the case. A number of less important provisions were approved.

One of the partners of the firm died and young Roland, the senior clerk, fancied there'd be a chance of promotion, so he visited the other partner.

"I'm sorry to hear of Mr. Jones' death," he said, "and wondered if you would like me to take his place?"

"I would very much," came the reply, "if you can get the undertaker to arrange it."
